

I am on the telephone privacy act for Indiana, and I am writing you on behalf of that law. I do not want to see this law done away with in Indiana, and done nationally. Indiana has done a great job with this matter, and I am receiving about 10-12 fewer calls with this law. I do agree that this does need to be done nationally, however, I would like to see the individual states with these laws able to maintain their laws. So, please do not take these laws away from the individual states, but please consider doing this on a national level. Thank you for your time.
